

PERSONALIZED ANALYSIS

Where your revenue is quietly walking out.

A tailored estimate of the recurring revenue leaking out of your business — calculated from your own call volume and trade benchmarks.

Prepared for Jordan Miller

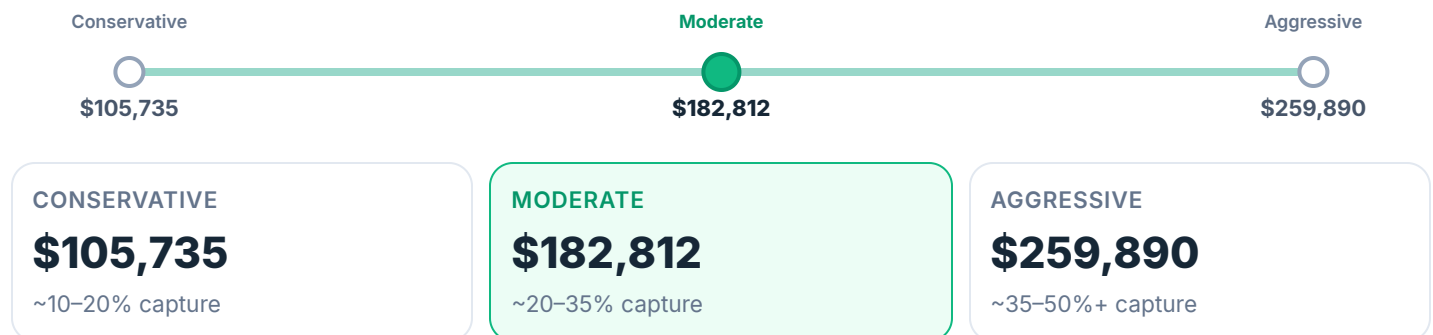

Based on your numbers, roughly \$182,812 a year may be recoverable.

Moderate modeled annual opportunity

\$182,812

Pest Control · 15 trucks · 525 calls / mo

The range of what's recoverable

See where it's going — and what it takes to recover it. →

01 Where the money is going

The moderate estimate, broken into its five independent revenue drivers. No double-counting — each is calculated against a separate pool.

	Book More Jobs Answer every call, day or night — and turn 34.1 more of them into booked jobs a month.	\$90,090
	Cut Your No-Shows Automated confirmations and reminders that save 12.1 appointments a month from the empty-slot pile.	\$32,000
	Raise Your Average Ticket Post-job follow-up that turns 25.3 more visits a month into plans, upgrades, and add-ons.	\$24,242
	Win More Repeat Revenue with Customers You Already Have Seasonal and win-back campaigns that pull 7 more jobs a month out of your existing list — no new ad spend.	\$18,480
	Get Your Time Back Automated scheduling and follow-up that hands 20 admin hours a month back to your team.	\$18,000
Total modeled annual opportunity		\$182,812

Book More Jobs is the largest modeled driver at \$90,090 annually in the moderate scenario.

Driver 1 (Missed-Call Recovery) applies only to currently-unanswered calls.

02 The money is leaking after the lead comes in

You already paid to create the opportunity. These are the places revenue slips away before, during, and after the job.

The phone rings after hours. Nobody picks up. By morning, the homeowner already booked someone else.

The truck rolls to an appointment and the house is empty. That slot — and the marketing that filled it — is gone.

The tech finishes a solid job, closes the ticket, and never mentions the maintenance plan while trust is highest.

Past customers sit in your list while seasonal demand passes and a competitor sends the reminder first.

None of it feels dramatic. That's why it keeps happening. Added up, the moderate model puts it at \$182,812 a year.

03 Five places revenue walks out

Missed Calls

CONSEQUENCE

Each missed call is a \$220 job that never enters the schedule — and often books with a competitor instead.

\$90,090 624VOICE

624Voice answers every call around the clock, qualifies the job, and books the appointment so revenue does not depend on who is at the desk.

No-Shows

CONSEQUENCE

Every no-show burns a dispatch slot and the marketing cost that created the lead — with \$220 jobs at stake per missed visit.

\$32,000 624VOICE

Automated SMS confirmations and reminders cut no-shows before the truck rolls, protecting booked capacity.

Upsell Revenue Left on the Table

CONSEQUENCE

Post-job follow-up captures \$80 add-on revenue that would otherwise walk out the door after every completed job.

\$24,242 624VOICE

624Voice triggers post-job sequences while the experience is fresh, prompting customers to accept offers your team already earned the right to make.

A Customer List You're Not Using

CONSEQUENCE

Proactive SMS campaigns turn that list into \$220 repeat and seasonal jobs without new ad spend.

\$18,480 624VOICE

624Voice runs seasonal reminders, maintenance prompts, and win-back messages so existing customers hear from you first.

Your Time

CONSEQUENCE

Manual coordination costs \$75 per hour in leadership and office time that never reaches the revenue line.

\$18,000 624VOICE

624Voice automates routine call handling and follow-up so your team spends time running the business, not chasing the phone.

04 How your numbers were calculated

CONSERVATIVE

\$105,735

Recovered booking: 15%
No-show reduction: 25%
Upsell rate: 5%
Admin hours saved: 10 hrs / mo
Campaign jobs: 4 jobs / mo

MODERATE

\$182,812

Recovered booking: 25%
No-show reduction: 40%
Upsell rate: 10%
Admin hours saved: 20 hrs / mo
Campaign jobs: 7 jobs / mo

AGGRESSIVE

\$259,890

Recovered booking: 35%
No-show reduction: 55%
Upsell rate: 15%
Admin hours saved: 30 hrs / mo
Campaign jobs: 10 jobs / mo

Figures use scenario modeling against your entered call volume, trade assumptions listed below, and independent driver pools with no double-counting. Actual results vary by market, execution, and configuration.

- Trade: Pest Control
- Estimated 35 calls per truck per month
- Average job value: \$220
- Missed call rate: 26.0%
- No-show rate: 12%
- Base booking conversion: 65%
- Average upsell value: \$80
- Estimates based on industry averages. Your results may vary.

05 Our risk, not yours

We guarantee you recover at least our service investment in booked service-visit revenue within 90 days of go-live - or we keep working, for free, until you do.

If we don't perform, you don't pay beyond the Results Engagement Period.

Even the conservative model puts \$105,735 a year on the table.

Not from finding a whole new market — from capturing more of the opportunities already moving through your business.
